OVULATION DISORDERS – GENERAL (OVG)

26. Check JH: Letter-to-the-editor: Ipsilateral versus contralateral ovary selection of

38. Check JH, O'Shaughnessy A, Vetter B: Use of leuprolide acetate for oocyte release and

49. Check JH, Peymer M: Prospective study of serum androgen levels stratified by increased or normal serum follicle-stimulating hormone in infertile women with regular menses. Endo Pract, 2(6)375-378, 1996.

664. DiAntonio A, Check JH, Srivastava M: One step closer to the development of a rapid bioassay to determine if adequate luteal phase progesterone supplementation is provided during in vitro fertilization-embryo transfer cycles. In: International Proceedings of the 16th World Congress on In Vitro Fertilization and 5th World Congress on In Vitro Maturation, Monduzzi Editore, 57-60, 2011.

OVULATION IN MENOPAUSAL WOMEN AND WOMEN WITH DIMINISHED OOCYTE RESERVE (OMW AND OWLER)

OVULATION IN WOMEN WITH LOW EGG RESERVE (OWLER)

76. Check JH: Response to queries concerning article "Pregnancy in premature ovarian failure after therapy with oral contraceptives despite resistance to previous human

90. Check JH: Oocytes from younger women with increased serum FSH are superior to those from older women with hypergonadotrophism. Hum Reprod 2003 Jan;18(1):219-20.

101. Check JH: Modified natural cycle IVF for poor responders. [letter-to-the-editor]. Hum

642. Check JH, Cohen R: Live fetus following embryo transfer in a woman with diminished egg reserve whose maximal endometrial thickness was less than 4mm. Clin Exp Obst Gyn 2011;38:330-332.

675. Check JH, Liss J: The effect of diminished oocyte reserve in younger women (age ≤37)

668. Check JH: Physicians should be more open-minded about performing in vitro fertilization-embryo transfer in women with diminished oocyte reserve and consider the couple’s wishes and desires. Clin Exp Obst Gyn 2012;39:5-10.

702. Check JH, Wilson C: The younger the patients the less adverse effect of diminished oocyte reserve on outcome following in vitro fertilization-embryo transfer as long as the proper ovarian stimulation protocol is used. J Reprod Contracep 2013;24:221-227.

721. Caruso M, Check JH: Absence of blood type A or AB may be associated with diminished oocyte reserve. Clin Exp Obst Gyn 2015;42:
MALE FACTOR – DIAGNOSIS (MFD)

128. Check JH, Shanis B, Bollendorf A: Computer assisted semen analysis not superior to routine analysis in distinguishing fertile from subfertile men. Archives of Andrology

152. Shanis BS, Katsoff D, Check JH, Hoover L: Sperm morphology using strict criteria not useful in predicting poor pregnancy rates (PRs) despite adequate fertilization. In: IX

164. Check ML, Kiefer D, Check JH, Hourani W, Long R: Treatment of sperm with

170. Check JH, Cochrane H, Yuan W, Wilson C: Evidence using a shared oocyte pool that the sperm rather than the oocyte in some cases may be responsible for the production of embryos with a high percentage of fragmented blastomeres - Case report. Clin Exp Obst Gyn 2004;31:139-140.

175. Choe JK, Check JH, Krotec JW, Summers-Chase D, Horwath D: High DNA fragmentation indices on the sperm chromatin structure assay correlate more with
increased risk of miscarriage rather than conception failure in women who were refractory to achieving successful pregnancy following in vitro fertilization-embryo transfer. In: International Proceedings of the 8th International Congress of Andrology, Medimond Editore, Pgs. 87-90, 2005.

183. Check JH, Katosff B, Wilson C, Bollendorf A: A case whose outcome is consistent with the possibility that if slow embryo cleavage is related to a male factor the prognosis is far greater than if it was related to an egg factor. Clin Exp Obst Gyn 2011;38:201-202.

656. Check JH, Kramer D, Hourani W, Bollendorf A: Low hypoosmotic swelling test scores

MALE FACTOR TREATMENT (MFT)

198. Check DJ, Check JH, Bollendorf A: Fresh versus frozen seminal plasma for enhancing

211. Check JH, Peymer M, Jairaj P: Single daily monitoring of periovulatory estradiol, progesterone and luteinizing sera hormone levels in natural cycles useful for timing

233. Choe JK, Check JH, Katsoff D, Krotec JW, Amui J: In vitro fertilization with intracytoplasmic sperm injection is an effective method to overcome the embryo implantation abnormalities associated with sperm with subnormal hypo-osmotic swelling test scores. In: International Proceedings of the 8th International Congress of Andrology,

243. Check JH, Dix E, Bollendorf A, Check D: Fertilization by intracytoplasmic sperm injection using sperm with subnormal morphology using strict criteria results in lower

CERVICAL MUCUS PROBLEM (CMP)

ENDOMETRIOSIS (E)

IN VITRO FERTILIZATION – GENERAL (IVFG)

314. Summers D, Check JH, Hoover L, O'Shaughnessy A, Nazari A: A 36 hour time of retrieval from human chorionic gonadotropin (hCG) injection may produce better pregnancy rates (PR) than a 34 hour interval. In: IX World Congress on In Vitro

350. Wilson C, Check ML, Check JH, Kiefer D, Choe JK: Recombinant FSH (especially Gonal-F) may adversely effect the uterine environment. Reprinted from: 12th World

352. Check JH, Nazari P, Check ML, Choe JK, Liss JR: Prognosis following in vitro fertilization-embryo transfer (IVF-ET) in patients with elevated day 2 or 3 serum follicle stimulating hormone (FSH) is better in younger vs older patients. Clin Exp Obst Gyn 2002;29:42-44.

DiAntonio A, Choe JK, Check JH: A drop in serum estradiol the day after human chorionic gonadotropin (hCG) shot does not adversely affect pregnancy rates per embryo transfer in women with very decreased oocyte reserve. In: International Proceedings of the 16th World Congress on In Vitro Fertilization and 5th World Congress on In Vitro Maturation, Monduzzi Editore, 67-70, 2011.

Citrino G, Check JH, Choe JK: A comparison of pregnancy outcome in women with normal oocyte reserve according to the use of high or low dose follicle stimulating hormone (FSH) stimulation. In: International Proceedings of the 16th World Congress on In Vitro Fertilization and 5th World Congress on In Vitro Maturation, Monduzzi Editore, 71-74, 2011.

Slovis BH, Check JH: Younger women with diminished oocyte reserve are not more prone to meiosis errors leading to spontaneous abortion than their age peers with normal oocyte reserve. Clin Exp Obst Gyn 2013;40:29-32.

EMBRYO CRYOPRESERVATION (CRY)

DONOR EGG/EMBRYO (DEE)

438. Check JH: The use of the donor oocyte program to evaluate embryo implantation. The

447. Check JH, Fox F, Deperro D, Davies E, Krotec JW: Efficacy of sharing oocytes from

458. Check JH: A 59-year-old woman gives birth to twins – when should a fertility specialist

681. Katsoff B, Check JH, Mitchell-Williams J: Defective oocytes are not a common cause of

SEX SELECTION – FAMILY BALANCING (SS)

497. Check JH, Szekeres-Bartho J, Nazari P, Katz Y, Check ML: A corpus luteum is not a

547. Check JH, Vetter BH: A challenge to the concept of tubal reflux to explain the rise and

16.

PELVIC PAIN (PP)

REPRODUCTIVE ENDOCRINE DISORDERS (RED)

716. Check JH, Dowland W: Detection of a microgonadotropinoma by magnetic resonance imaging performed because of excellent response to controlled ovarian hyperstimulation despite elevated day 3 FSH. Clin Exp Obst Gyn 2015;42:279-281.

MEDICAL ENDOCRINE DISORDERS (MED)

MEDICAL DISORDERS (MD)

601. Brasile D, Katsoff B, Check JH: Moderate or severe depression is uncommon in women seeking infertility therapy according to the Beck Depression Inventory. Clin Exp Obst Gyn 2006;33:16-18.

608. Check JH, Katsoff B, Cohen R: A case report showing that a woman with ulcerative colitis refractory to standard therapy responded well to the sympathomimetic amine dextroamphetamine sulfate. Inflam Bowel Dis 2011;17:870-871.

717. Check JH: Sympathomimetic amines are a safe, highly effective therapy for several female chronic disorders that do not respond well to conventional therapy. Clin Exp Obst Gyn 2015;42:267-278.

626. Check JH, Dix E, Wilson C, Check D: Progesterone receptor antagonist therapy has therapeutic potential even in cancer restricted to males as evidenced from murine testicular and prostate cancer studies. Anticancer Res 2010;30:4921-4924.
